

Miscellaneous/consulting services

TMF staff will train/assist individual lab in aspects of mouse colony breeding, such as wean pups, extract tail DNA, set up timed mating, dissect mouse embryos; also derive mouse embryonic fibroblasts, and mouse ES cell culture etc. with TMF's expertise. These services will be provided in contingent upon the availability of time, equipment, animal health condition, and other factors.

To request such services from Transgenic Mouse Facility:

- Schedule an appointment with facility Director, Fuming Pan (244-0649, fpan@illinois.edu) to discuss the project.
- Complete and submit the Service Request Form to the facility.
